ASUS | NVIDIA

NVIDIA®

A person's hands are visible in the upper right, placing a red LEGO brick onto a tall, dark grey skyscraper. The entire scene is a city skyline constructed from various colored LEGO bricks (grey, red, white, blue) on a dark surface. The background is a dark, out-of-focus image of a person's torso and arms, suggesting they are the one building the city. The overall lighting is dim, with a blue tint.

Over **4M+** AI Developers Worldwide

ASUS

NVIDIA

Key Personas for AI Development

Understanding AI Development Audience

AI Researcher/Data Scientist/
AI Practitioner

AI Developers/ Engineers

AI Application Developer

Focus

Extract insights from data, explore and create new algorithms

Designing, building, and deploying AI models

Creating AI-powered user experiences

Skills

Deep understanding of AI/ML concepts and statistical analysis

Understanding of model deployment and scaling, experience with MLOps tools

Full-stack skills in software, APIs, and data

Responsibilities

Researching new algorithms and techniques

Building AI pipelines and optimizing models for deployment

Developing applications that use AI models

Cares about

Rapid prototyping / experimentation without extra costs, low latency, flexibility, and scalability

Challenges for AI Development

Personas

New AI Developer

- ✗ Confusing system choices
- ✗ Limited AI Tools

AI Developer on PC/Mac

- ✗ Limited Performance
- ✗ Limited GPU Memory
- ✗ Limited AI Tools

AI Developer on Private Shared Server

- ✗ Limited access
- ✗ High Cost

AI Developer on Cloud

- ✗ High Cost
- ✗ Data security
- ✗ Complex setup

AI Development Workflow is Complex

Introducing the ASUS Ascent GX10

Accelerated by
 **NVIDIA**

Based on NVIDIA DGX™ Spark
Ultra-small, Built for AI Breakthroughs

ASUS Ascent GX10

Compact, Powerful, and Scalable

Powered by NVIDIA

GB10 Superchip

20-core Arm® CPU &
Blackwell GPU

Up to

1 petaFLOP

Performance Optimized for
fine-tuning & inference

128GB

Unified Memory

Scalable

Dual-GX10

ConnectX®-7
enables seamless
expansion

Secure &
Developer-Ready

DGX OS

(Ubuntu-based)

Preloaded

AI Software Stack

Supports CUDA, PyTorch, TensorFlow & more

4 x USB-C

HDMI 2.1

Network
LAN

NVIDIA®
ConnectX® -7

ASUS

 **NVIDIA**

Embrace the AI Wave

Stellar Design

The new GX10 design features clean, rectilinear lines, demonstrating our commitment to efficient integration.

Superior Thermal Engineering

The design prioritizes unobstructed airflow, ensuring efficient heat dissipation and silent cooling

Optimized Stacked Cooling

The square, upright form factor ensures seamless integration into diverse working environments, maximizing space utilization and workflow efficiency.

Ascent GX10 – Personal AI Cloud

Deployment Options

Network connected

Standalone

NVIDIA AI Developer Systems

Model Sizes

* Estimates based on available GPU memory in bytes * 2 for FP4 data minus 20% for overhead running model
**DGX Spark 128GB total system memory, 100GB available for user data

ASUS

NVIDIA

12X higher cost AI Dev in the Cloud

Feature	GPU Memory	FP4 Support	FP8 Support
ASUS Ascent GX10 x 2	200GB	✓	✓
ASUS Ascent GX10	100GB	✓	✓
H200 SXM	141GB	X	✓
H100 NVL 94GB	94GB	X	✓
H100 80GB	80GB	X	✓
A100 80GB	80GB	X	X
L40S 48GB	48GB	X	✓

AI Dev Systems – TCO – 3 Years

AI Scalable Development

Key Workloads

Accelerating AI workloads for developers, researchers, data scientists, and students

AI Development

NVIDIA Omniverse Blueprint

Build a Digital Twin for
Interactive Fluid Simulation

NVIDIA Omniverse Blueprint

ASUS

NVIDIA

Ascent GX10 Advantages for AI Developers

- Enables developers to run large models, up to 405B parameters, and large AI workloads locally
- NVIDIA AI software stack provides developers with tools to build & run AI
- Data stays local, no need to transfer data to external locations
- Your own personal AI cloud – no contention for data center compute or expense of cloud instances
- Connect two Ascent GX10 to work with larger models & workloads
